

Alpine Senior Credit I

Investor Letter — Second Quarter 2026

Dear Limited Partners,

We are pleased to report another stable quarter for the Fund. Net asset value increased modestly quarter-over-quarter, and portfolio income remained in line with expectations, with a gross portfolio yield of approximately 7.8%. Borrower credit quality remains sound: portfolio net leverage stands at approximately 3.9x and weighted interest coverage at 3.1x. No borrowers are in default, and no covenant waivers were requested during the period.

All facility-level covenants retain comfortable headroom, with the tightest — a minimum interest coverage requirement of 2.0x — remaining well above threshold. We continue to see attractive deployment opportunities in senior secured lending across the DACH region.

Sincerely,
Alpine Credit Management GmbH
